1.List all 6 phases of SDLC in order with one line about each.

ans:-

Phases of SDLC (in order)

- 1.Requirement Analysis: Gathering and defining what the software needs to accomplish based on user and business needs.
- 2.Design: Creating system architecture, UI mockups, and database schemas for the solution.
- 3.Development (Coding): Writing the actual source code to build the software features.
- 4.Testing: Verifying and testing the application to find and fix bugs or defects.
- 5.Deployment: Releasing the completed software into a live production environment for users.
- 6.Maintenance: Updating, patching, and improving the software post-release based on feedback or issues.

2.Write 3 differences between Agile and Waterfall models.

ans:-

- Approach: Agile follows an iterative/incremental approach, while Waterfall follows a linear/sequential approach.
- Flexibility: Agile allows modifications to requirements mid-project, whereas Waterfall strictly locks requirements from the beginning.
- Delivery: Agile delivers software in small functional increments, while Waterfall delivers the complete final product at the end of the project cycle.

3.Name the 3 main Scrum roles and write one line about the responsibility of each.

ans:-

- Product Owner (PO): Defines user stories, prioritizes the product backlog, and aligns the team with business goals.
- Scrum Master: Facilitates daily Scrum processes, ensures Agile practices are followed, and clears impediments for the team.
- Development Team: Cross-functional group responsible for designing, coding, and testing product deliverables each Sprint.

4.What is a Sprint in Scrum? Mention its typical duration.

ans:-

- A Sprint is a fixed-length, repeatable time-box during which a Scrum team works to complete a specific set of tasks or features. Its typical duration is 1 to 4 weeks

5.What do these Jira board columns mean: To Do, In Progress, Done, Backlog?

ans:-

- Backlog: A prioritized list of all pending features, tasks, and bugs that need to be worked on in future sprints.
- To Do: Tasks committed for the current sprint that have not yet been started.
- In Progress: Work items currently being actively developed or worked on by team members.
- Done: Completed tasks that have passed all development, testing, and approval criteria.
