Mini Project :-6

1. Create the project folder

Create a folder named gym-landing-page with these two files:

gym-landing-page/

│

├── index.html

└── style.css

2. Create index.html

Copy this complete code into index.html.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <title>IRONCORE FITNESS - Gym</title>

  <!-- Bootstrap CSS -->
  <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.8/dist/css/bootstrap.min.css"
      rel="stylesheet">

  <!-- Custom CSS -->
  <link rel="stylesheet" href="style.css">
</head>
```

```
<body>

  <!-- NAVBAR -->
  <nav class="navbar navbar-expand-lg navbar-dark bg-dark">
    <div class="container">

      <a class="navbar-brand fw-bold" href="#">
        IRONCORE FITNESS
      </a>

      <button class="navbar-toggler" type="button"
          data-bs-toggle="collapse"
          data-bs-target="#gymNavbar"
          aria-controls="gymNavbar"
          aria-expanded="false"
          aria-label="Toggle navigation">

        <span class="navbar-toggler-icon"></span>
      </button>

      <div class="collapse navbar-collapse" id="gymNavbar">

        <ul class="navbar-nav ms-auto">
          <li class="nav-item">
            <a class="nav-link" href="#plans">Plans</a>
          </li>

          <li class="nav-item">
```

```
            <a class="nav-link" href="#timetable">Timetable</a>
          </li>

          <li class="nav-item">
            <a class="nav-link" href="#enquiry">Enquiry</a>
          </li>
        </ul>

      </div>
    </div>
</nav>

<!-- HERO SECTION -->
<section class="hero-section text-center text-white">

  <div class="container">

              placeholder="Write your message"></textarea>
  </div>

  <!-- Submit -->
  <button type="submit" class="btn btn-primary w-100">
    Submit Enquiry
```

```
            </button>

          </form>

        </div>

      </div>

    </section>

    <!-- FOOTER -->
    <footer class="bg-dark text-white text-center py-3">

      <p class="mb-0">
        © 2026 IRONCORE FITNESS. All Rights Reserved.
      </p>

    </footer>

    <!-- Bootstrap JavaScript -->
    <script
src="https://cdn.jsdelivr.net/npm/bootstrap@5.3.8/dist/js/bootstrap.bundle.min.js"></
script>

</body>
</html>
```

3. Create style.css

Create a new file named style.css in the same folder.

Copy this CSS:

```
/* General styling */
body {
  font-family: Arial, sans-serif;
  margin: 0;
}

/* Hero background */
.hero-section {
  background: linear-gradient(
    135deg,
    #111827,
    #1d4ed8
  );
  padding: 100px 20px;
}

/* Gym timetable */
.table-container {
  width: 100%;
  max-width: 100%;
}

.gym-table {
  width: 100%;
  border-collapse: collapse;
```

```
  table-layout: fixed;
  font-size: 12px;
}

.gym-table th,
.gym-table td {
  border: 1px solid #cccccc;
  padding: 10px 4px;
  text-align: center;
  overflow-wrap: anywhere;
}

.gym-table th {
  background-color: #123456;
  color: white;
}

/* Smaller timetable text on mobile */
@media (max-width: 400px) {
  .gym-table {
    font-size: 11px;
  }

  .gym-table th,
  .gym-table td {
    padding: 8px 2px;
  }
}
```

Important: The hero background is styled only in style.css, as required. The timetable uses your own CSS without Bootstrap table classes. The plans use Bootstrap grid classes, not custom Flexbox or CSS Grid.

4. Understand the Bootstrap layout

Plans section preview

Monthly

₹1,500

Gym Access

Basic Training

Locker Facility

Fitness Guidance

Best Value

Quarterly

₹4,000

Full Gym Access

Personal Training

Locker Facility

Diet Guidance

Yearly

₹14,000

Unlimited Gym Access

Personal Trainer

Locker Facility

Diet and Fitness Plan

Illustrative layout: the actual cards are built with Bootstrap HTML.

- col-12: Cards stack vertically on phones.
- col-md-4: Three cards appear in one row from 768px upwards.
- h-100: Helps cards in the same row match heights.
- border-primary border-3: Highlights the Quarterly card.

- badge bg-primary: Creates the Best Value badge.

5. Test your website at three screen widths

Open index.html in Chrome or Edge.

Press F12, then Ctrl + Shift + M to open the responsive device toolbar.

Responsive testing

Tested at 360px – no horizontal scrollbar, overlapping or cut-off content

Tested at 768px – no horizontal scrollbar, overlapping or cut-off content

Tested at 1200px – no horizontal scrollbar, overlapping or cut-off content

Completed

0/3

At 360px, especially check the timetable and navbar. At 768px and 1200px, check that the three plan cards appear side by side.

6. Create a public GitHub repository

1. Open GitHub – Create a new repository.
2. Repository name: gym-landing-page.
3. Select Public.
4. Click Create repository.
5. Open your VS Code terminal inside the gym-landing-page folder.

Run these commands:

```
git init

git add index.html style.css

git commit -m "Create gym landing page"

git branch -M main

git remote add origin https://github.com/YOUR-USERNAME/gym-landing-page.git
```

git push -u origin main

Replace YOUR-USERNAME with your actual GitHub username.

If Git is already connected to another repository, check it first using:

git remote -v

Do not add a second origin if one already exists; update the existing remote if necessary.

Final submission checklist

- index.html created with Bootstrap CSS.
- style.css linked after Bootstrap.
- Responsive navbar with Plans, Timetable and Enquiry links.
- Hero heading, tagline of at least 15 words and button.
- Three membership cards with four perks each.
- Quarterly card highlighted with Best Value badge.
- Six timetable rows with fictional trainers.
- Enquiry form with required email and three plans.
- Tested at 360px, 768px and 1200px.
- Public GitHub repository gym-landing-page created and code pushed.

Note: The enquiry form currently displays the form and uses browser validation; it does not send enquiries to a database or email without a backend.
