Session 10

1. Add Bootstrap responsive Navbar

The navbar will contain:

- Apna PG Finder (brand)
- Home
- Listings
- Contact
- Responsive toggler button for smaller screens.

Add this code immediately after the opening <body> tag in index.html.

```
<nav class="navbar navbar-expand-lg navbar-dark bg-dark">
  <div class="container">

    <a class="navbar-brand" href="#home">
      Apna PG Finder
    </a>

    <button class="navbar-toggler" type="button"
      data-bs-toggle="collapse"
      data-bs-target="#navbarMenu"
      aria-controls="navbarMenu"
      aria-expanded="false"
      aria-label="Toggle navigation">

      <span class="navbar-toggler-icon"></span>
```

```
    </button>

    <div class="collapse navbar-collapse" id="navbarMenu">

      <ul class="navbar-nav ms-auto">

        <li class="nav-item">
          <a class="nav-link" href="#home">Home</a>
        </li>

        <li class="nav-item">
          <a class="nav-link" href="#listings">Listings</a>
        </li>

        <li class="nav-item">
          <a class="nav-link" href="#contact">Contact</a>
        </li>

      </ul>

    </div>
  </div>
</nav>
```

Important: The toggler needs Bootstrap JavaScript.

Add this script immediately before the closing </body> tag:

```
<script
src="https://cdn.jsdelivr.net/npm/bootstrap@5.3.8/dist/js/bootstrap.bundle.min.js"></
script>
```

2. Replace six text boxes with Bootstrap Cards

First, create one image named room.jpg.

You can use your own photograph or drawing of a PG bedroom. Save it inside your project folder.

Shivji PG

shivjipg.com

Your folder should look like this:

pg-finder-site/

│

├── index.html

└── room.jpg

Now replace your old six listing boxes with this code.

```
<div class="container mt-4" id="listings">

  <h2 class="text-center mb-4">
    Available PG Rooms
  </h2>

  <div class="row g-4">

    <!-- Card 1 -->
    <div class="col-12 col-sm-6 col-lg-4">
      <div class="card">
        <img src="room.jpg" class="card-img-top"
          alt="Sunshine PG room">

        <div class="card-body">
```

```
        <h5 class="card-title">Sunshine PG</h5>
        <p class="card-text">City: Ahmedabad</p>
        <p class="card-text">Rent: ₹5,000</p>
        <a href="#contact" class="btn btn-primary">View</a>
      </div>
    </div>
</div>

<!-- Card 2 -->
<div class="col-12 col-sm-6 col-lg-4">
    <div class="card">
      <img src="room.jpg" class="card-img-top"
          alt="Royal PG room">

      <div class="card-body">
        <h5 class="card-title">Royal PG</h5>
        <p class="card-text">City: Surat</p>
        <p class="card-text">Rent: ₹7,000</p>
        <a href="#contact" class="btn btn-primary">View</a>
      </div>
    </div>
</div>

<!-- Card 3 -->
<div class="col-12 col-sm-6 col-lg-4">
    <div class="card">
      <img src="room.jpg" class="card-img-top"
          alt="Green House PG room">
```

```
      <div class="card-body">
        <h5 class="card-title">Green House PG</h5>
        <p class="card-text">City: Vadodara</p>
        <p class="card-text">Rent: ₹8,000</p>
        <a href="#contact" class="btn btn-primary">View</a>
      </div>
    </div>
  </div>

  <!-- Card 4 -->
  <div class="col-12 col-sm-6 col-lg-4">
    <div class="card">
      <img src="room.jpg" class="card-img-top"
          alt="Comfort PG room">

      <div class="card-body">
        <h5 class="card-title">Comfort PG</h5>
        <p class="card-text">City: Ahmedabad</p>
        <p class="card-text">Rent: ₹9,000</p>
        <a href="#contact" class="btn btn-primary">View</a>
      </div>
    </div>
  </div>

  <!-- Card 5 -->
  <div class="col-12 col-sm-6 col-lg-4">
    <div class="card">
```

```
        <img src="room.jpg" class="card-img-top"
            alt="Happy Stay PG room">

        <div class="card-body">
          <h5 class="card-title">Happy Stay PG</h5>
          <p class="card-text">City: Rajkot</p>
          <p class="card-text">Rent: ₹10,000</p>
          <a href="#contact" class="btn btn-primary">View</a>
        </div>
      </div>
    </div>

    <!-- Card 6 -->
    <div class="col-12 col-sm-6 col-lg-4">
      <div class="card">
        <img src="room.jpg" class="card-img-top"
            alt="Dream Home PG room">

        <div class="card-body">
          <h5 class="card-title">Dream Home PG</h5>
          <p class="card-text">City: Surat</p>
          <p class="card-text">Rent: ₹12,000</p>
          <a href="#contact" class="btn btn-primary">View</a>
        </div>
      </div>
    </div>

  </div>
```

Remember: We are using the same room.jpg image for all six cards, as required.

3. Add Bootstrap Carousel with three slides

Create three of your own images and save them inside your project folder:

Yha PG nahi Pariwar milega | Best PG in Ahmedabad | LIVZO

slide1.jpg

PG in Ahmedabad | Boys and Girls Paying Guest in Ahmedabad

slide2.jpg

PG in Nagpur | Affordable Boys & Girls PG Accommodation for Students & working Professionals

slide3.jpg

Save your own selected images using these exact filenames:

slide1.jpg

slide2.jpg

slide3.jpg

Now add this carousel code after the navbar and before the listings section.

```
<div id="pgCarousel" class="carousel slide"
    data-bs-ride="carousel">

  <!-- Indicators -->
  <div class="carousel-indicators">

    <button type="button"
      data-bs-target="#pgCarousel"
      data-bs-slide-to="0"
      class="active"
      aria-current="true"
```

```
      aria-label="Slide 1">
    </button>

    <button type="button"
      data-bs-target="#pgCarousel"
      data-bs-slide-to="1"
      aria-label="Slide 2">
    </button>

    <button type="button"
      data-bs-target="#pgCarousel"
      data-bs-slide-to="2"
      aria-label="Slide 3">
    </button>

  </div>

  <!-- Carousel Slides -->
  <div class="carousel-inner">

    <div class="carousel-item active">
      <img src="slide1.jpg"
          class="d-block w-100"
          alt="Comfortable PG bedroom">

      <div class="carousel-caption">
        <h5>Find Your Perfect Room</h5>
        <p>Comfortable rooms at affordable prices.</p>
```

```
    </div>
  </div>

  <div class="carousel-item">
    <img src="slide2.jpg"
      class="d-block w-100"
      alt="PG common living room">

    <div class="carousel-caption">
      <h5>Enjoy Comfortable Living</h5>
      <p>Find a friendly place to stay.</p>
    </div>
  </div>

  <div class="carousel-item">
    <img src="slide3.jpg"
      class="d-block w-100"
      alt="PG kitchen">

    <div class="carousel-caption">
      <h5>Best Facilities</h5>
      <p>Enjoy a comfortable lifestyle.</p>
    </div>
  </div>

</div>

<!-- Previous Button -->
```

```
  <button class="carousel-control-prev"
    type="button"
    data-bs-target="#pgCarousel"
    data-bs-slide="prev">

    <span class="carousel-control-prev-icon"></span>
    <span class="visually-hidden">Previous</span>

  </button>

  <!-- Next Button -->
  <button class="carousel-control-next"
    type="button"
    data-bs-target="#pgCarousel"
    data-bs-slide="next">

    <span class="carousel-control-next-icon"></span>
    <span class="visually-hidden">Next</span>

  </button>

</div>
```

Task 3 complete

Important concepts:

- carousel creates the slider.
- carousel-inner holds all slides.
- carousel-item represents one slide.
- active makes the first slide visible initially.

- carousel-control-prev moves backwards.
- carousel-control-next moves forwards.

Constraint: Only the first slide has the active class.

4. Add Bootstrap Enquiry Form

Add this code after your six cards and before the closing </body> tag.

```
<div class="container mt-5 mb-5" id="contact">

  <h2 class="text-center mb-4">
    PG Enquiry Form
  </h2>

  <form>

    <!-- Name -->
    <div class="mb-3">
      <label class="form-label">Full Name</label>

      <input type="text"
          class="form-control"
          placeholder="Enter your name"
          required>
    </div>

    <!-- Email -->
    <div class="mb-3">
      <label class="form-label">Email Address</label>
```

```
  <input type="email"
        class="form-control"
        placeholder="Enter your email"
        required>
</div>

<!-- City -->
<div class="mb-3">
  <label class="form-label">Select City</label>

  <select class="form-select" required>

    <option value="">Choose your city</option>
    <option>Ahmedabad</option>
    <option>Surat</option>
    <option>Vadodara</option>
    <option>Rajkot</option>

  </select>
</div>

<!-- Checkbox -->
<div class="form-check mb-3">

  <input type="checkbox"
        class="form-check-input"
        id="agree"
        required>
```

```
        <label class="form-check-label" for="agree">
          I agree to be contacted
        </label>

      </div>

      <!-- Submit Button -->
      <button type="submit" class="btn btn-primary">
        Submit Enquiry
      </button>

    </form>

</div>
```

Important Bootstrap form classes:

Class	Purpose
form-control	Text and email inputs
form-select	Dropdown selection
form-check-input	Checkbox
form-check-label	Checkbox label
form-label	Input label
btn btn-primary	Blue submit button

Note: This form provides browser-side validation but does not save or send enquiries to a server.

5. Final folder structure

Your project should look like this:

pg-finder-site/

│

├── index.html

├── room.jpg

├── slide1.jpg

├── slide2.jpg

└── slide3.jpg

6. Test your website

Open index.html in Chrome and check:

- Navbar toggles on mobile.
- All six cards display images.
- Cards show 1, 2 and 3 per row at the appropriate screen sizes.
- Carousel has three slides and working previous/next controls.
- Only one carousel slide is active.
- Enquiry form has all five required controls.

7. Commit and push to GitHub

Open VS Code Terminal and execute:

git add index.html room.jpg slide1.jpg slide2.jpg slide3.jpg

git commit -m "Add Bootstrap navbar cards carousel and form"

git push origin main

Final assignment checklist

Your progress

0/14

Added responsive Bootstrap navbar

Added Home, Listings and Contact links

Added Bootstrap JavaScript bundle

Created six Bootstrap cards

Used room.jpg for all six cards

Kept responsive grid classes

Added three-slide carousel

Added indicators and previous/next controls

Used exactly one active slide

Added captions to all slides

Created Bootstrap enquiry form

Added required email field and checkbox

Tested website in Chrome

Committed and pushed all files to GitHub

You can send me your index.html code if you want me to check whether all four tasks are correctly completed before submission.
