9. Parking Management System

```
#include<stdio.h>

int calculateParkingFee (int hours)
{
   if(hours <= 2)
   return 30;

   else if(hours <= 5)
   return 50;

   else if(hours <= 10)
   return 100;

   else
   return 150;

}

void displayReceipt(char vehicle[], int hours, int fee)
{
    printf("\nVehicle = %s", vehicle);
   printf("\nHours = %d", hours);
   printf("\nFee = %d\n", fee);
}

int main()
{
   char vehicle[20];
   int hours, fee;
```

```
    printf("Enter vehicle type: ");
    scanf("%s", vehicle);

    printf("Enter hours: ");
    scanf("%d", &hours);

    fee = calculateParkingFee(hours);

    displayReceipt(vehicle, hours, fee);

    return 0;
}
```
